- TV cable and socket are ready for each bedroom and living room
- Power outlets are provided
- Three direct telephone lines for each Residence with an indirect telephone line connecting to hotel services
- Broadband internet access: Data points are provided
- Car park: 2 car parks for 3- and 4-bedroom residences, 3 car parks for penthouses

**NOTES**

Stoneworks and timber: Stoneworks and timber are natural materials containing veins with tonality differences. Stoneworks will have some color and markings caused by their complex mineral composition and incorporated impurities. While such materials can be pre-selected to a certain extent before installation, it is not possible to achieve total uniformity, consistency of colour, grain and appearance between the individual pieces of stoneworks and timbers in their selection and installation. Timber strips are also subject to thermal expansion and contraction beyond the control of the builder and the developer. Selection of natural stoneworks for the gourmet kitchen is a choice offered to purchasers and the developer shall not be responsible for any safety/maintenance challenges that may arise whatsoever.

**Kitchen exhaust hood:** This includes the regular cleaning of grease filters according to the equipment manufacturer’s recommended procedures.

**Cable television and internet access:** The sub-lessee is liable to pay subscription fees and such other such fees to the service provider or other relevant authorities. The developer is not responsible to any of the said parties for the service connection for their respective subscription channels.

Kitchen cabinets, fan coil units, electrical points and plaster ceiling boards: Layout/location of the above are subject to the architect’s sole discretion and final design.

**Brand and model:** The choice of brand/model for fittings, equipment, appliances supplied shall be subject to availability.

**Air conditioning system and fresh air intake:** The air conditioning system has to be maintained and cleaned on a regular basis by the sub-lessee. Maintenance includes regular cleaning of filters and clearing of condensate drain pipes.

**Mechanical ventilation system:** The above for the kitchen and toilet exhaust system is to be maintained by the sub-lessee on a regular basis.

**Kitchen exhaust hood:** This includes the regular cleaning of grease filters according to the equipment manufacturer’s recommended procedures.

**False ceiling:** Space provision allows for the optimal function and installation of the M&E services. Access panels are allocated for maintenance and cleaning access to concealed M&E equipment. Where removal of equipment is needed, ceiling works would be required.

**Prefabricated toilets:** Certain bathrooms and toilets may be of prefabricated construction and all penetrations are sealed at the manufacturer’s factory prior to installation on site. Any subsequent penetrations are not recommended as they will compromise the water proofing warranty.

**Space provision:** The “Wine Bar” (if applicable to the unit) demarcated in the show unit, the sales brochures, or any other materials, are only space provisions to indicate the potential use of the spaces described. The descriptions do not imply that the spaces have been or will be fitted out for any particular purpose.

**Concierge and doorman services:** The above will be provided by the vendor prior to the formation of the management corporation, and such services (similar to security and other services) will be paid for from the maintenance charges payable by the sub-lessee under this agreement.
